Box II Observations wilere certain claims were found unsearchable (Continuation of item 2 of first sheet)
This International Search Report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:
Claims Nos.: because they relate to subject matter not required to be searched by this Authority, namely:
2. Claims Nos.: because they relate to parts of the International Application that do not comply with the prescribed requirements to such an extent that no meaningful International Search can be carried out, specifically:
3. Claims Nos.: because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).
Box III Observations where unity of invention is lacking (Continuation of item 3 of first sheet)
This International Searching Authority found multiple inventions in this international application, as follows:
see additional sheet
As all required additional search fees were timely paid by the applicant, this international Search Report covers all searchable claims.
2. As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.
3. As only some of the required additional search fees were timely paid by the applicant, this international Search Report covers only those claims for which fees were paid, specifically claims Nos.: 1, 2, 7, 8 in part and 3-6 completely
4. No required additional search fees were timely paid by the applicant. Consequently, this International Search Report is restricted to the Invention first mentioned in the claims; it is covered by claims Nos.:
Remark on Protest The additional search fees were accompanied by the applicant's protest. X No protest accompanied the payment of additional search fees.

FURTHER INFORMATION CONTINUED FROM PCT/ISA/ 210

This International Searching Authority found multiple (groups of) inventions in this international application, as follows:

Invention 1: claims 1-8 (partially)

A modified hirudin molecule having a substitution $L \to T$ at position 13 and a pharmaceutical composition comprising said molecule.

Inventions 2-6: claims 1-8 (partially)

Modified hirudin molecules having a substitution $L \to T$, A, H, Q or T at position 15 and a pharmaceutical composition comprising such a molecule.

Inventions 7-14: claims 1-8 (partially)

Modified hirudin molecules having a substitution $V \to A$, G, H, K, N, P, Q or R at position 21 and a pharmaceutical composition comprising such a molecule.

Inventions (further): claims 1-8 (in part)

Modified hirudin molecules having a substitution at position 29, 30, 40, 47, 48, 53, or 57 and a pharmaceutical composition comprising said molecule.

Inventions (further): claims 1-8 (in part)

All combinations of modifications at more than one position as referred to in claim 1 and a pharmaceutucal composition comprising such a molecule.

· Inventions (further): claims 9 and 10

A peptide molecule as mentioned in claim 9 and its use for the manufracture of a modified hirudin molecule.
